Drinks Service Refrigeration

New Drinks Service Refrigeration

For over 50 years, Gamko has been supplying high quality solutions to the drinks service refrigeration market. Market leader Gamko offer an extensive range of back bar refrigeration, glass frosters and sliding top bottle coolers with a number of options suitable for any location and application. All Gamko products meet the requirements of Climate Class N, which means that these products can function efficiently and at their optimum in temperatures up to 32°C.

Maxiglass

Under Counter Bottle Coolers

- Large bottle capacity maximises product display and means less downtime when re-stocking
- Large finned evaporator delivers cold drinks display and improves heat transfer thus saving energy
- Clever slide out refrigeration design allows for easy servicing
- Low maintenance condenser – plug and play refrigeration counter without the maintenance
- Choice of anthracite and stainless steel exterior fronts
- Light(s) and door lock(s) as standard

Upright Bottle Coolers

- Large capacity display cooler maximises drinks merchandising
- 5 high specification chromium flat shelves as standard
- Locks as standard giving secure bottle storage
- Large bottle capacity means less downtime when re-stocking
- Choice of anthracite and stainless steel exterior fronts to suit your location
- Optional wine racks or shelves – multi use of adaptable cabinet

Glass Frosters

Glass Frosters

- Choice of solid or heated glass door for ease of product viewing
- Temperature low of -21°C – optimum cooling of glass, perfect for serving
- Low maintenance condenser – allows for continuous maintenance free operation
- 80 pint glass capacity for busy serving outlets
- Stainless steel exterior as standard
