Foster Multidecks

Introducing Foster levels of performance and reliability to the Multideck Market

Keep your products fresh and appealing and maximize your sales with Foster's exciting new range of Multidecks. Our Multideck products offer excellent open display frontage and even temperature retention throughout.

Premier Multidecks

- Modern refrigeration system allows the product to operate at a reduced noise level whilst performing energy efficiently
- Excellent temperature retention - ensures that even your most delicate products maintain their freshness and appeal
- Perfect to maximise display - low fronted, with wide opening allows for 30% extra display capacity compared to standard multidecks
- Deep shelf display area maximises your product offering especially at busy periods
- Storage capacities from 810 to 1266 litres
- Tall frontage display area with full length glass end panels maximises visibility
- Choice of two finishes - high quality stoved paint finish in white or silver grey
- 3 long life fluorescent tubes (treble the life expectancy of standard tubes)
- Supplied with transparent ticket strips as standard
- Integral forced air refrigeration system for optimum temperature performance
- Airflow creates protective air curtain maintaining product temperature
- Fully automatic defrost for efficient operation
- Plug in for instant and flexible use
- Removable front unit cover allows easy access for service, minimising down time
- Shelving holes available at 3cm intervals allowing for greater tailoring of product display

Intelligent Controller with easy to read digital display

Internal lights with on/off switch and light covers ensure shatter proof illumination

Product delivered with shelves pre-fitted and transparent ticket strip - meaning minimum time required for user setup

Pro Multidecks

- Slim design ideal in stores and outlets where space is at a premium
- Full length glass end panels increase display visibility
- 3 sizes available in 2 finishes
- Storage capacities from 415 to 975 litres
- High quality 304 stainless steel finish available
- High quality stoved paint finish on white model
- Integral forced air refrigeration system for optimum temperature performance
- Large capacity multi-deck: maximises display area for minimal footprint
- Robust construction for durability in operation
- 3 long life fluorescent tubes (treble the life expectancy of standard tubes)
- Supplied with transparent ticket strips as standard
- Shelving holes available at 3cm intervals allowing for greater tailoring of product display
- Fully automatic defrost for efficient operation
- Removable front unit cover allows easy access for service, minimising down time
- Plug in for instant and flexible use
- Castors on 90 & 130 models as standard Adjustable feet on 195 models

Modern refrigeration system allows the product to operate at a reduced noise level whilst performing energy efficiently

Slim Multidecks

- Maximum display for minimum footprint and cost - 650mm narrow depth
- Perfect to get your products on display to capitalize on those impulse buys
- Choice of high quality 304 stainless steel finish or white stoved paint finish
- Maintains even temperature throughout to optimise product storage
- Storage capacities from 290 to 520 litres
- 3 long life fluorescent tubes (treble the life expectancy of standard tubes)
- Supplied with transparent ticket strips as standard
- Acrylic riser packs available as an option to prevent merchandise slipping if shelves are set at a tilted angle.
- Shelving holes available at 3cm intervals allowing for greater tailoring of product display
- Fully automatic defrost for efficient operation
- Easily removable unit cover for cleaning
- Plug in for instant and flexible use

Night blind as standard: reduces energy consumption when display is not required

Integral forced air refrigeration system

Mini Multidecks

- Low height display case ideal for reaching impulse buyers near pay points
- Display capacity for minimal floor space
- Tempt them: Give your customers great access to your products in a well lit low level display case
- Alternative heights designed to fit seamlessly with existing display cases /end of aisle arrangements
- Storage capacities from 1200 to 1670 litres
- 4 sizes available (across different heights and widths)
- Integral forced air refrigeration system
- Silver grey or white stoved paint finish
- 2 long life fluorescent tubes (treble the life expectancy of standard tubes)
- Supplied with transparent ticket strips as standard
- Shelving holes available at 3cm intervals allowing for greater tailoring of product display
- Fully automatic defrost for efficient operation
- Plug in for instant and flexible use
- Easily removable unit cover for cleaning
- Acrylic riser packs available as an option to prevent merchandise slipping if shelves are set at a tilted angle.
- Available on castors as an option for maximum manoeuvrability and flexibility

Internal lights with on/off switch and light covers ensure shatter proof illumination
